Web Bank

As a private customer, the bank typically covers your loss when hackers compromise IT security, gain access to, and steal from your bank account. However, as a company you are often not reimbursed.

Given the abundance of IT security breaches, crime, and cyber insurance products are in high demand. When a full crime coverage is not relevant for you, our Web Bank insurance, which is a scaled down policy covering electronic theft of money undertaken by third parties only, might fit your needs.

- Underwritten to specific risks and exposures
- Very broad appetite covering most sectors and industries
- Market leading coverage forms developed over time
- Ample capacity (EUR 35M+)
- Self-insured retention starts at EUR 700
